FIRM PROFILE

Francis Landscapes is an international Austrian/Lebanese firm comprised of landscape architects, architects, interior architects and planners. The firm has its design headquarters in Beirut with a satellite office in Vienna.

Founded in 1987 by Ms. Irmtraut Schoeber Francis, the firm provides full planning, design and supervision services in landscape architecture, environmental planning and urban design.

The firm's national and international projects are spread out in the Middle East, Africa and Europe and are located in numerous countries including Lebanon, Egypt, Jordan, Qatar, Syria, Saudi Arabia, U.A.E, Kuwait, Nigeria, Algeria, Morocco, Kyrgyzstan, France, Belgium, England and India. They include a wide range of urban design, mountain and beach resorts, public parks, hotels, university campuses, sports clubs and office buildings as well as state-of-the-art residences, palaces and government buildings.

The firm has extensive experience in all facets of design, demonstrating competency regardless of the complexities of different climates, geographical locations, social situations and the variety of client expectations with the overriding goal being to provide excellence and timeless design.

From defining the program to forming the space and exploring potential materials, Francis Landscapes employs a variety of design tools, from hand-drawing and model- making to computer graphics while the decision-making process reflects a continual exchange with clients, architects and consultants.

In collaboration with high profile international architectural firms such as Zaha Hadid, Jean Nouvel, Arata Isozaki, OMA and SOM architects and major hotel operators such as Kempinski, Marriott, Ritz, Sheraton, Starwood, etc. Francis Landscapes is currently working on large-scale projects with drive, commitment and continuous development.

PHILOSOPHY

The firm embodies a commitment to creative solutions that melds with cultural desires and functionality. The work is characterized by a philosophy of strong, simple design incorporating cultural and environmental forces that are unique to each site. This design philosophy is integrated with a clear understanding of costs, current construction techniques and scheduling and guided by the ever important emphasis on the client's needs and goals.

Exploring the relationship between art and culture, Francis Landscapes challenges traditional concepts of design. Their successful and innovative work results from balancing knowledge of history and tradition with sympathy for contemporary needs, while exploiting a clear understanding of both conceptual and material processes expressed through a mastery of construction and detail.

PRINCIPALS

Austrian by birth, *ImTrauT Schober* left her position as assistant to the Austrian Commercial Attaché in Lebanon to pursue her passion for landscape design. She studied Landscape Architecture at the English School of Landscape Design under renowned designers Robin Williams & Lucy Hutington.

Due to the situation in Lebanon and while living partly in Austria, Cyprus and Lebanon, she founded Francis Landscapes Ltd. in 1987 and established its base in Beirut.

Her son, Frederic Francis, inherited his deep passion and respect for nature from an early age. After completing studies in Landscape Design in France in 1988, and graduating as a Landscape Architect in Belgium in 1992, he returned to Lebanon in 1993 and has been leading the practice ever since. He has won numerous competitions for projects in Lebanon and abroad during the years, earning him a wide reputation.

AL ANDALUS MIXED USE COMPLEX // KUWAIT CITY, KUWAIT // 2008 - 2012 // 20,000m²
The Andalus Mixed Use Complex is generated by marrying and integrating the landscape to the existing architectural structure. The landscape nature arranged on many levels, with overlapped levels, secluded sitting areas and hanging gardens, provides both an extension to existing nature and an outstanding symbol of its artificiality. Lawn strips located at the entrance with parallel paving strips and several longitudinal water features, to site a few, produce a natural dynamistic movement and thus prolong the continuity found between the outdoor space and the inner space

ARIG H.Q. TOWER // RIYADH, SAUDI ARABIA // 2008 - 2010 // 4,000m²

AIR ALGÉRIE // ALGIERS, ALGERIA // 2007 // 4,000m²

AL HASSAWI MALL // JEDDAH, SAUDI ARABIA // 2006 - 2008 // 30,000m²
A modern approach finds expression in the landscape design of this mall, whose entrance area and reception piazzas are animated by many fountains and interesting water features. Gardens, rich and sumptuously green, grow in dense clusters of tropical vegetation and create lush backdrops to the extensions between the interior and exterior of the mall, acting as a recreational pleasant link.

NORTH PARK OFFICE COMPLEX (ARAMCO'S HEADQUARTERS) // DAMMAM, SAUDI ARABIA // 2006 - 2008 // 200,000m²
Designed along a dynamic combination of orthogonal and shifted grids, the design for the company's premises results in intersections that serve as both functional and aesthetic nodes. Landscaped grass knolls, marking the key access points, provide movement and visual relief against the flat terrain, while a principal axis, highlighted through the use of flaming torches and myriad water features, leads to the project's major twin building masses.

AL HAMRA MIXED USED COMPLEX // SHARQ, KUWAIT // 2005 // 15,000m²

AL SUMARIA // MANSOURIEH, LEBANON // 2006 // 1,500m²
An old concrete building was restored to become a modern professional-looking TV headquarters. Its entrance spreads out between two water planes on top of which is a roof garden. The new building character is shown through its ground level transparency that allows for an indoor/ outdoor interaction, as seen by the wide patio that houses the secretarial offices and overlooks the entrance with its olive trees.

C.N.T.S. // ALGIERS, ALGERIA // 2005 // 10,000m²
The ultra-hi-tech design for this technical space research centre addresses various issues related to public and staff usage. The landscape scheme tackles the modern entrance and reception areas, fountains and waterfalls, and attends to children's playgrounds and sport activities.

CENTRAL PRISON // MUSCAT, OMAN // 2005 // 80,000m²
The hardscape design for this penal complex encompasses both aesthetic and security concerns in its interpretation of the main piazzas, driveways, parking lots, recreational areas and sport activities hubs through a very dry mineral language.

AL MURJAN HOSPITAL // JEDDAH, SAUDI ARABIA // 2005 // 20,000m²
The concept for the triangular site of this medical facility creates an environment suitable for easy circulation maneuverability around all buildings located on its premises. The landscaping proposal addresses the surrounding grounds, entrance piazza, water features, pools, roof gardens, patio and parking areas where a regular formation of palm trees, running parallel to each other as well as to the site line, are interspersed with an uninterrupted grass flow that curves at the tip of the entry road.

CMA - CGM BANK // ALGIERS, ALGERIA // 2005 // 2,000m²
A distinctive symmetry governs the landscape design of this bank in unison with the similar architecture of the building proper. The primary entry point is an expansive square pavement flanked by generous carpeted lawns that wrap around three sides of a spectacular fountain, of a tripartite division, in an exact mirror image match, thus giving off the impression of a landscape that had been deliberately sliced through; its clean edges parting to introduce the main bank building.

CYBER PARC // ALGIERS, ALGERIA // 2004 - 2005 // 5,000m²
An ultra-modern hi-tech design canters around the multifunctional buildings of this centre for research and technology, tackling the entrance, reception areas, fountains, waterfalls and roof gardens in an up-to-date contemporary language.

DEBBAS // BEIRUT, LEBANON // 2004 // 1,000 m²
AL SADER MOSQUE // TYRE, LEBANON // 2004 // 1,000 m²

MULTIFUNCTIONAL COMPLEX // BIRKHADEM, ALGERIA // 2003 - 2006 // 10,000m²
Lining the principal axis of this modern complex, trees planted in close progression introduce its entrance and reception areas. An inner atrium, rich in foliage, creates a transitional internal link, while roof gardens, with private decks and swimming pools, open up to the sky. An extension houses restaurants that overlook sumptuous gardens, lawns and water mirrors, while beach activities zones and parking areas complement the projects architectural grid

MAR ABDA CHURCH // ROUMIEH, LEBANON // 2003 // 5,000m²

AMERICAN EMBASSY CONSULAR SECTION // BEIRUT, LEBANON // 2002 - 2004 // 1,000m²
A garden in a Lebanese house setting characterises the landscaped green spaces surrounding the Consular section of the American Embassy grounds.

Lebanon Fouad Chehab Ave. No. 2151, Beirut- T: +961 1 50 20 70 — **Austria** Lammgasse 7, 1080, Vienna- T: +43 665 67105 402
E-mail: landscape@francislandscapes.com – www.francislandscapes.com

ST. GEORGES CATHEDRAL // BEIRUT, LEBANON // 2002 - 2004 // 2,000m²
A formal archaeological garden was designed to revitalise the surrounding outdoor area of this venerable cathedral. Its monastic flavour insures a serene secluded calm charm, and includes a procession area, a sculpture garden and an Italian-type garden, where exterior mass and other ceremonies may be conducted.

AL KHANDAMA PROJECT // MECCA, SAUDI ARABIA // 2002 - 2004 // 25,000m²
The creation of a new town for pilgrims guides the design of this urban project. Architectural units of high-rises wrap around widely spacious prayer plazas, and link towards the Kaaba in a direct axial linearity. Roof gardens, decked in extensive greenery amid landscaped terraces with sizable water features and fountains, top the buildings.

GOLDEN PYRAMIDS PLAZA // CAIRO, EGYPT // 2001-2005 // 50,000m²
Alleviating the notorious congestion of Heliopolis, the project's design is calmly private, blanketed in the quiet serenity of its introverted and profusely planted courtyards and gardens. With all the quaintness of a mini-village, it moves and breathes though plazas and pedestrian axes that have all been modelled with the aim of fusing both its commercial and residential needs.

BENETTON BUILDING // DAMASCUS, SYRIA // 2001 - 2002 // 600m²
The space around the retail building is landscaped to include a small restaurant surrounded by a front garden comprising grass lawns, shrubs and trees.

ABOU ADAL ESTABLISHMENT HEAD OFFICE // BEIRUT, LEBANON // 1999 - 2001 // 4,000m²
The geometric landscape plan of this establishment employs basalt stone to cobble the pavements of the entrance piazza, reception court and paths leading to the parking area. The offices overlook meticulously maintained roof gardens and patios laid out in a similar style.

INSTITUT CORTBAWI // ADMA, LEBANON // 1999 // 10,000 m²
MKALLES IMMOBILIERE S.A.L. HOLDAL // MKALLES, LEBANON // 1999 // 4,000 m²

BYBLOS BANK HEAD OFFICE // ACHRAFIEH, LEBANON // 1998 -1999 // 2,000m²
A strict angularity defines the landscape. A clean-cut composition rules the design starting from the entrance piazza, with its two rectilinear water mirrors, to the Zen-garden minimalism of the roof gardens, governed by intersections of pebbles, gravel and shrubbery. The geometrical resulting patterns are clearly visible from the upper floors that overlook the landscaped patios.

KHATIB AND ALAMI HEAD OFFICE // JNAH, LEBANON // 1998 -1999 // 1,500m²
The design for this engineering and building company allows for its offices to interact with small geometrically tailored gardens that are dispersed intertwiningly within the open-floor space. The concept includes water mirrors and reflecting pools in addition to a smokers' area provisional space with its own greenery

RIZK HOSPITAL // ACHRAFIEH, LEBANON // 1998 // 3,000m²

CONSULTANT FOR LACECO ON THE URBAN AND LANDSCAPE DESIGN FOR THE LEBANESE UNIVERSITY CAMPUS // CHOUEIFAT, LEBANON // 1995 // 700,000m²
The framework for this huge educational community revolves around creating a learning-village where the buildings and mixed-use developments are placed in very modern gardens. Highly planar, the pedagogic concept speaks out through the streetscapes, formed along green spines, bicycle lanes and pedestrian links throughout the campus. Provisions include courtyards for sports activities buildings. In addition, the project comprises landscaped parking areas, entry piazzas and open-air amphitheaters.

The offset symmetry of these luxury high-rises is echoed in the modern geometrical design of its hard and soft landscaped entrance, reception areas, and extravagantly spacious square patios. Manicured piazzas, intermingled with pathways, link to fountains and rectangular water features, to playgrounds, amphitheater and parking areas.

PRIVATE RESIDENCE // SABBOURA, SYRIA // 2006 // 20,000m²
A discrete but stately private residence is positioned on a sloped hill overlooking a valley. Its elegant white architecture is richly complimented by the design of its surrounding terraced gardens, all of which are connected by an axial arrangement of water that links the whole landscape together, with its two swimming pools, its gazebos and its numerous pavilions.

MR. MAHMOUD FOULADFARD RESIDENCE // MECHREF, LEBANON // 2006-2009 // 5,000m²
MR. MICHEL ABI NADER RESIDENCE // BATROUN, LEBANON // 2006-2009 // 12,000m²

PRINCE MANSOUR BIN ABDALLAH BIN ABDUL AZIZ // RIYADH, SAUDI ARABIA // 2006 // 24,000m²
The insistent proposal gives unlimited reign for an immense garden from which one strolls to any part of the architecture underfoot. Peel off the top earthen crust, and you find a sumptuous villa, a recreational club and state-of-the-art offices tucked underneath its luxuriant verdant skin. Pushing the envelope, the novel cave-like architecture becomes a sanctuary. Totally organic, not a single straight line interrupts the curvaceous nature of the interior and exterior pools, cascades and water planes.

MR. ASSAAD HARK // BATROUN, LEBANON // 2006 // 18,000m²
MR. AOUN TANNOUS // BEIRUT, LEBANON // 2006
MR. ZAHER EL KHATIB RESIDENCE // MECHREF, LEBANON // 2006 // 3,000m²

PRIVATE RESIDENCE // MUSCAT, OMAN // 2005// 80,000m²
The hardscape design for this penal complex encompasses both aesthetic and security concerns in its interpretation of the main piazzas, driveways, parking lots, recreational areas and sport activities hubs through a very dry mineral language.

SHEIKH FAHIM // RABAT, MOROCCO // 2005 // 14,000m²
Catering to diverse client requirements, the design of this North African residence, located in a lake region, is comprised of several entrances and reception areas and is profusely marked by myriad water features as fountains, water mirrors, cascades and a swimming pool. Notable rose gardens beautify the grounds that house the numerous pergolas of this hilltop villa, so that its orientation overlooks the lake spread out on the valley bed.

Lebanon Fouad Chehab Ave. No. 2151, Beirut- T: +961 1 50 20 70 — **Austria** Lammgasse 7, 1080, Vienna- T: +43 665 67105 402

H.E. SHEIKH DIAB BIN ZAYED // RABAT, MOROCCO // 2005 // 4,000m²
This urban residence is imbued with highly modern landscaped outdoor spaces, patios and terraces. Wooden pergolas with stylish stone built-in benches overlook a swimming pool, while the uncluttered parking area echoes the tempered ambiance of Moroccan weather.

SHEIKH ABDELRAHMAN BIN MAHFOUZ // JEDDAH, SAUDI ARABIA // 2005 // 13,000m²
MR. MEHRAN KHWANDA // TARTUS, SYRIA // 2005
MR. MAHER MERHEBI RESIDENCE // BENNAY, LEBANON // 2005 // 4,000m²
MR. FEYROUZ RESIDENCE // TRIPOLI, LEBANON // 2005 // 2,500m²
MR. FADI SALAME RESIDENCE // BEIT MERY, LEBANON // 2005 // 800m²
DR. MOUNIR HARASANI RESIDENCE // JEDDAH, SAUDI ARABIA // 2005 // 2,000m²

MR. OSAMA AL MUTABAGANI RESIDENCE // JEDDAH, SAUDI ARABIA // 2005 - 2006//3,000m²
The landscape design presents a mellow refuge from the harsh surrounding desert environment. Outdoor spaces, a swimming pool, patios, terraces and even the parking areas are treated with innovative materials. Creating a languid protective shield for this Arabian home, a garden overlooks a lagoon spreading out in planar blue gradients, offering itself up to the residence's breathtaking perspectives.

PRIVATE RESIDENCE // JEDDAH, SAUDI ARABIA // 2005 // 2,000m²
True to the nature of this private residence, the landscape design works to create stately outdoor spaces as the entrance piazza, parking area, patios and terraces, whilst conserving the serenity of more private areas as the Jacuzzi and swimming pool.

H.E. MR. SAAD HARIRI RESIDENCE // ZOUKAK EL BLAT, LEBANON // 2004 - 2009 // 9,000m²
SHEIKHA IMAN BIN MAHFOUZ RESIDENCE// JEDDAH, SAUDI ARABIA // 2004// 10,000m²
MR. IMAD EL KHATIB RESIDENCE // MECHREF, LEBANON // 2004 // 7,000m²
MR. MOHAMD AL OTHMAN RESIDENCE // BEIT MERY, LEBANON // 2004// 20,000m²

HH SHEIKH SAEED BIN ZAYED AL NAHYAN // RABAT, MOROCCO // 2004 - 2008 // 22,000m²
A typical Moroccan garden strategy outlines the design of the property's entrance, reception areas, and patios, while a playful setting, alternating between open and closed courtyards, governs the pavilions. Playground and sports activities area find themselves surrounded by varied water features, like cascades and fountains, which in turn highlight the mystical spirit of the tranquil fragrant rose gardens

HH SHEIKH ABDUL RAHMAN BIN MAHFOUZ // JEDDAH, SAUDI ARABIA // 2004 - 2007 // 13,000m²
In addition to the entrance and reception areas, the grounds of this Arabian residence are embellished by abundant water features, ranging from cascades and fountains to water mirrors and swimming pools, assuaging against the dryness of the arid Arabian climate, softening the intensity of the heat through shady gazebos, scented rose gardens and pergolas. Included in the design are sports activities areas as the tennis court for recreational relief.

HH SHEIKH MANSOUR BIN ZAYED // RABAT, MOROCCO // 2004 - 2006 // 45,000m²
A seamless flow between the landscaped exterior spaces of this imposing private residence governs the geometrical design of the entrance, reception areas and external "majlis". The perfumed allure of the rose gardens permeates the grounds, suffused with the gentle tinkle of the preponderant water features that find expression through myriad fountains, ponds and water channels running under shady pergolas.

HH SHEIKH MANSOUR BIN ZAYED // RABAT, MOROCCO // 2004 - 2006 // 40.000m²
Constituting the "majlis" of an imposing private residence is a geometrical landscaped design governing its entrance and reception areas. A perfumed allure of rose gardens permeates the grounds, suffused with an enormous amount of water features and overlooking an unremitting open view towards the valley below.

MRS. MAHA AYASS RESIDENCE // MECHREF, LEBANON // 2004 - 2006 // 2,000m²
MR. MOHAMMAD AL OKAR RESIDENCE // SAIDA, LEBANON // 2004 - 2006// 10,000m²

MRS. SHERIFA NAJIAH RESIDENCE //JEDDAH, SAUDI ARABIA // 2004 - 2005 // 5,000m²
A bright landscape concept primes the terrain of this sun-kissed project, where the gradient yellow colours glow in the architecture and flora, and turns its outdoor spaces, patios, terraces and swimming pool into oases of verdant comfort and luminous charm.

MR. ABDALLAH BERRY RESIDENCE // TIBNINE, LEBANON // 2003 - 2005 // 8,000m²

Lebanon Fouad Chehab Ave. No. 2151, Beirut- T: +961 1 50 20 70 — **Austria** Lammgasse 7, 1080, Vienna- T: +43 665 67105 402
E-mail: landscape@francislandscapes.com – www.francislandscapes.com

H.E. SHEIKH M. AL TOBAISHI // RIYADH, SAUDI ARABIA // 2003 - 2005 // 250,000m²
The design for this vast farm incorporates outdoor areas including lakes and water gardens. Practical landscape solutions lend intelligent land-use for sports activities areas as the golf course, horseback riding corrals, landscaped swimming pools and the Jacuzzi. Waterfalls offer a vocalized aquatic vocabulary around the pool bars and outdoor amphitheatre, while stylised enclosures house the reception and car exhibition areas.

H.E. SHEIKH SALEM AL SABAH // KUWAIT CITY, KUWAIT // 2003 - 2005 // 3,000m²
The design of this royal retreat, that borders the sea, includes modern hard and soft landscaping for its expansive entrance, elegant reception areas, swimming pools, fountains and chic pergolas, all detailed in a clear-cut contemporary vision.

MR. HAMAD AL SHAAYA RESIDENCE // KUWAIT CITY, KUWAIT // 2002 - 2005 // 5,000m²
An interesting feature in the landscape design, that completes an estate composed of two separate blocks linked by a common garden, includes a modern Japanese garden, in addition to the requisite entrance piazza. Complementing the far eastern taste are profoundly tranquil water mirrors, pools and fountains. Pergolas and dry gardens add the finishing touch to this Arabian abode.

MR. ALI JAIDAH RESIDENCE // DOHA, QATAR // 2006 - 2009 // 8,000m²
The U-shaped architecture of this imposing residence leads the concept for its landscaped gardens that are fashioned along a classic Moroccan typology. An artificial lagoon was created so that all the gardens, wrapping around the U-shaped dominant form, are oriented towards it. Interior courtyards open up to exterior gardens; their elegant built-in Diwan-seating arrangements all interspersed with water features; twenty percent of which are canals that lead to water cascades and no-edge pools.

MR. BADR DARWISH RESIDENCE // DOHA, QATAR // 2006 // 2,000m²
The landscape design of this residence follows the classical prototype of a Moroccan garden. Its style alternates between open and closed courtyards replete with water features that join the entire architecture in the warm tones of sunny and other colors. The key element of the concept is that the entire project is constructed upon an artificial lagoon overlooking the sea and contains a private beach that insures seclusion and serenity.

HH SHEIKH ABDULLA SALEM AL SABAH // KUWAIT // 2008 // 3,000m²

SHEIKH WALID IBRAHIM // JUMEIRAH, DUBAI // 2006 // 6,000m²
A luxurious villa is located at the tip of the exclusive Jumeirah Palm Island project; an engineering feat of frond-crescent shaped islands; their total giving the form of a palm floating on the Arabian Gulf. Following the curvy man-made landscape, the gardens are shaped in a radial geometry echoed in the entrance, reception piazzas and water features. Pools situated on the sea give the impression that the villa's footprints rise up from the blue depths. Verdant and hi-tech, the villa has a private docking marina.

GAITH ESTATE // DOHAT EL HOSS, LEBANON // 2005 // 10,000m²
OGER // BEIRUT, LEBANON // 2003 // 6,000m²

PARKS / PUBLIC GARDENS

SAINT NICOLAS PUBLIC GARDEN // BEIRUT, LEBANON // 2011 // 2,000 m²
KING ABDULLAH MONUMENT PARK // THUWAL, SAUDI ARABIA // 2010 // 40,000m²
AL CHOUF RESERVE // BAROUK, LEBANON// 2009 // 5,000m²

PUBLIC GARDEN // TRIPOLI, LEBANON // 2007 //17,000 m²
Modeled along a modern approach, the garden is kept dynamic by a 45° angle shift in its primary axis that continues diagonally throughout the site and marks its two principal entry points. At the center of the garden, a land depression, surmounted by a bridge and flanked by two amphitheaters, follows a template of five rectangles divided by walkways leading up to ten thematic gardens; five of which are "senses" gardens, each planted with a particular sense in mind.

Lebanon Fouad Chehab Ave. No. 2151, Beirut- T: +961 1 50 20 70 — **Austria** Lammgasse 7, 1080, Vienna- T: +43 665 67105 402
E-mail: landscape@francislandscapes.com – www.francislandscapes.com

DBAYE PUBLIC GARDEN // DBAYÉ, LEBANON // 2002 - 2005 // 10,000m²
A highly geometrical design classifies the landscape of this public garden, suffused with colorful blooming trees as the lilac jacaranda and the pink hued albizia, which surround children's playgrounds and water garden. An open air amphitheater, suitable for various events is also factored in.

MARTYRS SQUARE// BEIRUT, LEBANON // 2004 //10,000m²

AL SHALLAL THEME PARK //JEDDAH, SAUDI ARABIA // 2002 - 2004 // 40,000m²
A playful concept guides the extensive landscape design of this theme park. The recreational nature of the project, whose activities zones surround a lake, lends itself to creating park facilities, restaurants and pavilions that imbue this public space with an outgoing fun-filled mood.

SIN EL FIL GARDEN // BEIRUT, LEBANON // 2001-2004 // 5,000m²
A green breathing space alleviates the congested atmosphere of the capital through well placed children's playgrounds and water gardens that are surrounded by jacaranda, pine and poplar trees. Love birds in artful cages are dispersed throughout this public garden that includes an open air amphitheater suitable for various special events.

QUADISHA GROTTO // BECHARRE, LEBANON // 2000 - 2001//10,000m²
This protected zone, classified as a world heritage centre, is home to the historic natural grotto of the Quadisha valley. Landscape and architectural studies to improve the access and the use of the grotto, along a gravel trail, with suitable parking, pathways, resting areas, guard house and a restaurant are all integrated in nature in a profoundly respectful manner that helps preserve the original character of the site.

HISTORICAL SITE OF CANA // CANA, LEBANON // 1998 -1999 // 20,000m²
A winding gravel trail meanders along the various parts of the project that overlooks magnificent valley and mountain views, whose aim is to improve the access and the use of the historical site through a gentle implementation of parking lot, walkways, shaded resting areas, guard house and restaurant completely in tune with the natural surrounding countryside.

BEIRUT'S HIPPODROME // BEIRUT, LEBANON // 1997-1998 // 50,000m²
A plan to revitalize this sizable urban public park, brimming with vast endless green lawns and public gardens, comes complete with jogging tracks, open-air exercise areas and an amphitheater for open air events.

PINE FOREST PUBLIC GARDEN // BEIRUT, LEBANON //1993 - 1995 // 300,000m²
Pine Forest is the most extensive public garden of Beirut. Its winning design challenges the strict triangular shape of the site; its free-forms providing levity within the strict geometry. Artificial mounds are fashioned to recreate the dune-like nature of the original landscape. At the center of the composition is a circular pool. Amid the pine-knit fabric activities can be enjoyed, ranging from botanic and rose gardens to an open-air amphitheater and children's playgrounds.

PINE FOREST PUBLIC GARDEN // BEIRUT, LEBANON // 1992 - 1993 // 300,000m²
The preliminary design of this site, of significant historical and ecological importance, was a joint effort with Lebanese Architect MR Pierre Neemeh and French landscape architect, Jacques Sgard (Paris- France). The overriding objective was to realize the complete overhaul and renovation of the capital's largest public garden by using organic free-form plots, broken by three ficus lined axes that converge at the centre of a circular round pool.

KING ABDALLAH II HOUSE OF CULTURE AND ARTS // AMMAN, JORDAN // 2011// 25,000m²

ROBERT MOUAWAD MUSEUM // BEIRUT, LEBANON // 1997 // 5,000m²
The key concept of this garden lies in designing it as an outdoor museum, an idea not without merit as it is a historic renovated garden. Extremely thematic, it features centennials, plentiful Pine and Cypress trees. An important feature is a path created to show the archeological relics that are placed within the verdant surroundings of this former palace.

SPORTS / RECREATION

SPORTS CLUB AND STADIUM // DOHA, QATAR // 2006 // 500,000m²
An interesting concept, comprised of a single row of circular constructions that grows rhythmically smaller along a linear well-defined axis, constituting the design of this hi-tech sports facility; from which the gradually decreasing cylindrical structures, houses all types of sports activities

BEIRUT SPORTS CITY // BEIRUT, LEBANON // 1995 // 250,000m²
Built upon rigorous international standards, the landscape design for this extensive sports city opens up its grandiose entry portals and offers up numerous piazzas, vast parking areas, and myriad water features all around. The streetscapes lead to a little hotel and several restaurants with hard landscaped areas, adding a modern touch to this state-of-the-art sports complex, where playgrounds and an open-air amphitheater are included.
